

- It's a career not just a job. Our field has many specialties to choose from including: residential, commercial, and industrial. Jobs range from service technician, electrical supervisor and estimators.
- Employers frequently visit Western Dakota Tech looking for new people to bring into the work force. In 2019, 91% of our graduates were placed in their field at the time of graduation.
- As an electrician, you will get to see projects from start (underground/utility work), to finish (testing and service work).
- You can be a part of an ever-evolving trade with alternative energy sources (wind, solar) and new technologies (LED lights, networked controls, automation, and power monitoring).

Electrical Trades

Students will learn to interpret and apply the requirements of the National Electrical Code. A solid background in the theory and technology of the electrical field will give the knowledge and ability to install, maintain, troubleshoot, and repair electrical circuits and equipment. According to the U.S. Bureau of Labor Statistics, in May 2022, the average wage in western South Dakota was \$52,360.

Why Western Dakota Technical College?

We deliver a personal, career-oriented education ideal for the student pursuing a meaningful profession and prideful future. Faculty, staff, and administration are committed to teaching the knowledge, skills, and behaviors students need to be successful.
